hledger: plain-text double-entry accounting

Double-Entry Accounting Basics

- all transactions move values from one account to another one

- five basic accounts
    - **Assets** - Things owned
    - **Liabilities** - Things owed
    - **Equity** (== Net Assets) - The amount invested by owners/shareholders
        - Assets = Liabilities + Equity
    - **Income** | **Revenue** - Money flowing in
    - **Expenses** - Money flowing out

Installation

- arch: `# pacman -S hledger hledger-ui hledger-web`
- deb: `# apt install hledger hledger-ui hledger-web`
- any*

Shell completion
- bash
- zsh, fish

Interfaces

- hledger-web : web wrapper (TCP:5000)
- hledger-ui : curses
- cli

Get going

```
$ tocuch ~/.hledger.journal $ hledger-web $ hledger-ui
$ vim ~/.hledger.journal
```
